

## ***FIRST TIME READINESS (FTR) SOLUTION***

***An Integrated Solution  
delivering the highest  
quality products to  
ensure Mission  
Readiness***

### **BUSINESS CHALLENGE**

Readiness of our modern systems has diminished over the last decade. The fundamentals of Integrated Product Support (IPS) have been forgotten. The IPS process supports Readiness through the development of key logistics products such as the Technical Manuals, Training Support Packages, Provisioning, Maintenance Engineering and supporting Logistics Documents. The quality of these support products has deteriorated resulting in rework, added schedule and added cost while driving down Readiness. The Lockwood Group's **FTR Solution** addresses these key issues.

### **THE LOCKWOOD GROUP'S FIRST TIME READINESS (FTR) SOLUTION**

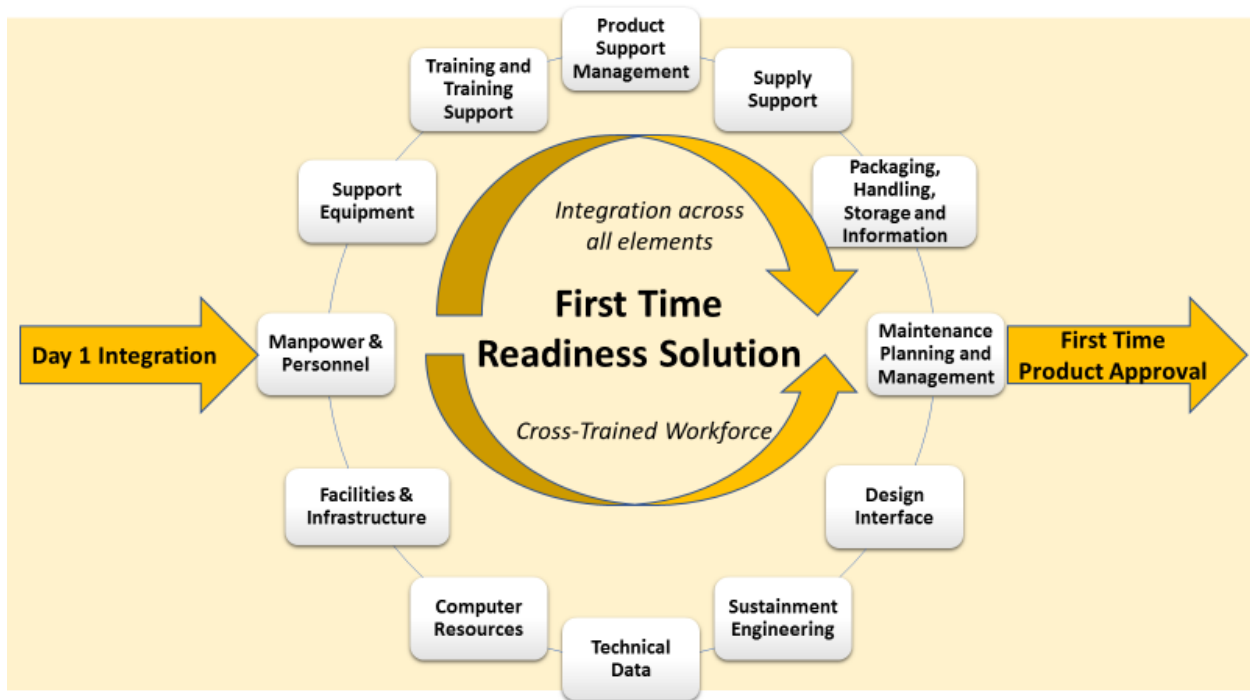

For decades, The Lockwood Group's Integrated Logistics Solution experts have been delivering innovative solutions to address the most challenging logistics problems for the Federal Government and Department of Defense technical community.

The Lockwood Group's **First Time Readiness** solution improves Readiness through these key steps:

- **FTR Solution** incorporates all 12-Integrated Product Support elements under a single ILS process to ensure **high visibility** of Logistics Readiness and integration across all elements of Engineering, Logistics and Program Management.
- **FTR Solution** establishes a continuum of Integrated Product Support Working Groups over the life cycle of program led by one ILS Manager leading "**weekly Readiness discussions**" with active participation from Program Management and Engineering Working Groups.
- **FTR Solution** utilizes a cross-trained team of interchangeable Technical Writers, Training Developers, Logistics Engineers, Maintenance Engineers and Provisioners that work efficiently to deliver high quality logistics support products with **less staff at lower costs**.
- **FTR Solution** delivers consistent logistics support products in direct compliance with Federal Government and DOD standard formats with **high approval rate** upon 1<sup>st</sup> delivery of the product which increases Readiness posture earlier in the program.
- **FTR Solution** is developed by former system Operators ensuring products are developed with user Readiness in mind.

**FTR Solution provides Day 1 integration ensuring Readiness is delivered faster, cheaper and more efficiently!**

**THE LOCKWOOD GROUP ADVANTAGE**

- Executed Integrated Logistics programs across all major Technology Platforms for the US Military.
- Build our products in accordance to Federal and Military Standards.
- Experience executing highly complex Integrated Logistics programs to include transitioning a Quick Reaction Capability system into a Program of Record.
- Embedded in the Military Logistics community for over 40 years, TLG has relationships at all levels of industry, government and military to pull together a true integrated solution.
- Trusted Integrated Logistics Agent with decades of DOD logistics expertise.

**KEY BENEFITS OF FTR SOLUTION**

- Lean and efficient requiring less manpower to execute.
- High quality support products the first time requiring little to no rework.
- “One stop shop” ensures integration of all logistics products.
- Greater Visibility into the Readiness of your system.
- Delivering products in accordance to what a user actually needs developed by our cross-trained team of ILS experts and former Users.
- No upfront training or ramp up time as our staff has experience with current program tools such as LMP, Windchill Product Lifecycle Management PLM system, DOD 40051 -1 & -2, and DOD 5000.

**Problem Solvers**

The Lockwood approach is focused on solving our customers’ challenges through innovation and carefully designed solutions. Our integrated solutions combine service-with-solution to provide the impact to increase performance, lower costs, save time, improve safety and enhance our customer’s Mission Readiness.
